

Dear Parents,

On Friday, April 23rd, 2010, the Gifford Farm and Environmental Center will bring their planetarium to St. James/Seton School. They will set it up in the St. James Parish Center, and this will be a fun way to learn more about the stars and planets. Other activities are planned for that day, so it will be busy!

The students will be in uniform on that day and will follow a normal lunch schedule.

The cost for each student to take part in the event is \$4.00. Please send money to school by Monday, April 19th.

Thank you,
The Fourth Grade Teachers
