FIVE DAYS OF FUN, LEARNING & NEW FRIENDS

We believe that the best way to learn about leadership is by doing. That's why Workshop is not like school. Instead, it's full of hands-on activities and interactive discussions. Students learn how to excel as individuals in one-on-one situations and as leaders of a group. We create a dynamic learning environment where students discover how to collaborate with others as well as tap into their own potential. Then, we help students apply what they learn at Workshop to their everyday lives.

Workshop attendees have gone on to become leaders in academics, sports, music, theatre, speech, student government and countless other activities. Students will leave Workshop with self-confidence, valuable skills such as time management and goal setting, and incredible ideas to take home to their schools and communities. Not only that, but they will make lasting memories and friendships. Students often say that Workshop is a life-changing experience and the best week of their summer, so let's go! Register today, and bring a few friends. We can't wait to see you this summer!
